Dear Pat, Mike and Rob

This past spring, we decided to have a 40 x 80 steel building with a wood frame office built on our current business site.

We checked out several steel building contractors and we were led to you for several reasons. First, we had heard from several clients that you had built for in the past, and secondly, we like the idea of the family-run business, which resembled our own.

We are nearing the end of our building project and we would like to express to you our thanks for making our building project a reality. We were very impressed by the professionalism and the attention to detail that you gave to our entire project.

We strongly recommend Riess Construction and are more than happy to be used for a reference.

Sincerely,

A handwritten signature in cursive script that reads "David L. Thomson".
